## POST-DOCTORAL RESEARCHER IN POLITICAL SCIENCE

## Summary

I am an ambitious, critical and collaborative post-doctoral researcher specializing in the relationship between (affective) polarisation and democracy, with broad interest in all forms of political polarisation and conflict. My research examines both how affective polarisation is (not) linked to democratic attitudes, and how democratic institutions shape polarisation dynamics and their consequences for democratic societies. In my dissertation, I combined a theoretical advancement of the concept of polarisation with extensive empirical analysis. As a winner of the prestigious Frank Cass Prize 2023 for best article in *Democratization*, my published work spans polarisation, conflict, institutional design, deliberative democracy, and political violence.
